

## Post-Career Fair Assignment

Describe your career fair experience...

- List questions/answers that you asked (say, 5-10) and those Q/As that they have asked you (5-10).  
Questions I asked were:
  - 1) What characteristics, educational background and skill set are you looking for in an applicant?
  - 2) What is your hiring process and when are the interviews?
  - 3) How well does your company fit with my Job preferences?
  - 4) Is there any position/openings for coop?
  - 5) What entry-level positions are available in your company?
  - 6) Can I leave my Resume?
  - 7) Can I have your Business Card?

Questions that they asked:

- 1) Which position are you looking for in our company?
  - 2) Which programming language are you good at?
  - 3) Asked me various questions based on Java
  - 4) Gave a brief description about the company and asked me to go on to the website and look for co-op opportunities available.
- Describe your strategy for talking to the representative

Firstly, shake hands with the representative and greet him/her. After that give them a brief about yourself what you are currently doing, what are your skill sets, what are you good at, which position are you looking for and also tell them that you researched about the company. Later on ask them if there are any openings or positions available for co-op or fulltime. If yes, they'll let you know and ask you to apply through the website or the career portal. At last, leave your resume with them and ask for a business card.

- A brief summary of feedback received  
They told me to be good at one thing and master it. Gave me feedback about my resume that it was too heavy content and the HR team does not have so much time to read everything. They told me to master a few skills which were required for the position I was looking for which could help me get a co-op/full time.
- Any additional points you would like to share  
I would just like to say that be confident, the way you present yourself says a lot about yourself. Prepare a nice elevator speech. Don't bore the recruiter by you just talking, let him/her also speak. Ask them questions about the company and positions available. Do research about the company before going there.
